

18 V-Li Professional Cordless

18 V System Why Bosch Li-Ion?

Burn-out proof

The 'smoking gun test'TM: two combi's – one with ECP⁺ and EMP⁺⁺ and one without.
Stall the machine and keep pulling the trigger. Within seconds one tool starts to fry.

Lifetime

Bosch Electronic Cell Protection (ECP) protects the battery from overload, overheat and deep discharge leading to 4 times longer lifetime. Unique Electronic Motor Protection (EMP) is able to shut the motor supply down completely protecting the tool from burn-out as demonstrated in the Smoking Gun Test (see above).

Runtime

Bosch Premium Lithium-Ion batteries work for longer on a single charge: Intelligent Current Management due to ECP Technology alongside a highly efficient motor which draws less energy results in longer runtime on a single charge. Independent tests by SLG Prüf und Zertifizierungs GmbH, Germany revealed that Bosch 2.6 Ah Li-Ion batteries are able to perform 141 applications on one battery charge compared to only 116 applications of a competitor's 3.0 Ah batteries.

Chargetime

The Bosch Turbo Charger charges batteries fully in 30 minutes. A 75% charge is achieved in only 15 minutes, 7 minutes faster than a leading competitor's.

Turbo

A no-load speed of 2050rpm and an impact rate of 31000 bpm make the new GSB 18 VE-2LI Professional the fastest Combi in the market.

Tough

Its all metal planetary gear box, Dura-shield housing and the unique uni-body drive-train make the GSB 18 VE-2LI almost indestructible. In fact both machine and battery are fully functional even after 2m drop onto concrete.

18 V-LI Professional Cordless

Mid-range Lithium-Ion drill/drivers

GSR 18 V-LI and GSR 18 V-LICP Professional

GSR 18 V-LI Professional

- ▶ Highest number of screwdriving applications per battery charge in its class (355 screws, 6 x 60 mm, in softwood (with 2.6 Ah battery)) due to innovative Bosch lithium-ion technology
- ▶ Fast work progress due to powerful motor
- ▶ Perfect handling due to compact design and low weight (only 1.8 kg)
